

SERVICES AVAILABLE

Residential Back Up Power

Virtually Silent

Installs indoors hassle free within 1 day

No generator permit necessary

All components UL listed

GREEN!

Commercial Back Up

Modular to meet requirements

UPS style applications

Extended run time

Emergency Lighting

Renewable Integration

Rechargeable backup power

Solar and Wind Power ready

Off-grid and grid tie solutions

Maintenance

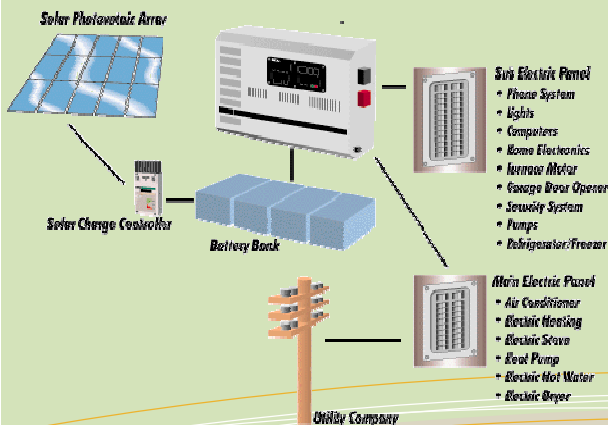

We are the only servicing agent for

Power Tower systems already installed.

Description of our systems

Our products range from 3kw to 11kw power capacity.

Prices typically range from \$6,000-\$15,000, normally a system will run for 1 to 2 days solely on batteries. Hybrid systems are available and can run indefinitely.

What is battery based back up power?

It is a combination that bridges the gap between UPS systems that provide seamless backup power and generators, which provide poor power quality and require a complex installation with frequent maintenance. Our systems require zero on going maintenance, produces no polluting emissions, and provides clean power to all items backed up.

How long does it take to charge the batteries?

During regular utility function the system will maintain 100% capacity by trickle charging. After a blackout, a full recharge typically takes 4-6 hours.

How do I know what system I need?

Our sales team can ask you a few questions over the phone and if you can provide enough information we'll be able to size the right system. If you don't know much about the electrical load we can set up a time to meet at your home or office and complete a site visit with you.

Capabilities

iPower Systems has combined top of the line inverter/chargers from the solar industry with the most durable, safe, and powerful batteries to provide your home or small business with uninterruptable backup power.

We have solutions for your most critical items like sump pumps and furnace or if you would like more functionality we can power all the items you'll need in the event of a black out.

Operation

We provide 24/7 customer service, should anything ever go wrong with the system we will take care of it immediately.

Service is unbeatable with a small family style business. Your satisfaction with pricing to customer support is our goal, it's the only way we know how to do business.

With sales and project management handled by one person there is no confusion of what is expected.
